

DIRECTIONS FOR USE

Apply only as directed.

Use Andersons Nutri DG[®] Dispersing Granule Technology 19-0-15 for greens and tees where a nitrogen and potassium application is desired or when micronutrients are needed to help correct or prevent deficiencies during the growing season.

Watering in this product will disperse each granule into thousands of particles. This will facilitate the movement of the nutrients into the soil. This particle dispersion will greatly reduce ball, shoe and mower pickup - minimizing nutrient loss.

Application to wet, close-cut golf turf may result in foliar staining, which will discolor the turf to a brown/black appearance. This will occur even if immediate irrigation or rainfall occurs. Be sure to apply this product to dry turf only.

Application Rates:

1.27 - 2.59 kg/100 m² (2.60 - 5.30 lbs/1,000 sq. ft.)

Apply at the rate for the amount of Nitrogen desired.

Use Rate kg/100 m ²	Nitrogen kg/100 m ²	Use Rate lbs/1,000 sq. ft.	Nitrogen lbs/1,000 sq. ft.	20 kg bag treats	20 kg bag treats
1.27	0.24	2.60	0.50	1,580 m ²	16,960 sq. ft.
1.90	0.36	3.90	0.75	1,050 m ²	11,300 sq. ft.
2.59	0.49	5.30	1.00	770 m ²	8,320 sq. ft.

For all applications:

- Immediately after application, apply a minimum of 5.1 mm (0.2 inches) of water to avoid staining and foot printing.
- Apply only at low rates if temperatures are 29° C (85° F) or above.
- Cold weather (lower than 7° C/45° F) can result in slower particle dispersion.

Notice: This product contains the micronutrient iron for extra greening and to help prevent iron deficiency. Iron may stain concrete and other surfaces. Misapplied product to these surfaces should be removed promptly by sweeping or blowing. **DO NOT WASH OFF WITH WATER.**

Recent research has shown that well-maintained turf is an effective environmental buffer that prevents pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.
